SKILLS

Languages
Python, Go, JavaScript, TypeScript, Dart

Back-end
FastAPI, Django, Fiber, REST API design

Front-end
React, HTML, CSS, Tailwind CSS

Mobile
Flutter

Databases
PostgreSQL, MySQL

DevOps & Systems
Git, Docker, Nginx, CI/CD (GitHub Actions), Linux, VPS, SSL, Vercel

Integrations
AI APIs, payment aggregators, third-party services

Analysis & Design
UML, MERISE

Testing & Quality
UAT and QA testing, Postman, Bruno

LANGUAGES

French: fluent
English: intermediate (technical documentation reading)

INTERESTS

Chess: strategy and problem solving
Reading: manga

PROFILE

Software engineer specialized in API design. I build complete web and mobile applications and take them all the way to production. I also integrate external services into my applications, such as artificial intelligence and payment solutions. As the founder of MyNkap, an AI-assisted personal finance SaaS platform already used in production, I also bring solid experience in systems analysis and design, as well as in testing and quality assurance.

PROFESSIONAL EXPERIENCE

Fullstack Analyst-Developer & QA (Intern): HR-Skills SARL

July 2026 to October 2026 · Professional internship

- Lead analyst of the company: system modeling with UML and MERISE
- Analysis and design of **HR-Skills Pay** (hrskills-pay.com), the company's payment aggregator, and contribution to its development with React, Go and PostgreSQL
- Analysis and design of **Père Nkap**, a mobile application for financial transactions
- User acceptance testing (UAT) and quality assurance (QA) on the company's applications

Web Developer (Intern): True Site Technology SARL

July 2025 to September 2025 · Academic internship

- Development of an e-commerce website for the company with Django and MySQL
- Front-end integration with HTML, CSS, Tailwind CSS and JavaScript

FREELANCE EXPERIENCE

Freelance Front-end Developer: National Energy

2026 · Fuel station, Yaoundé · national-energ.com

- Design and development of the company's showcase website with React (fuels, services, shop)
- Deployment on Vercel and domain name configuration

Freelance Front-end Developer: AfrikTech

2026 · Startup

- Design and development of the startup's showcase website presenting its services with React
- Deployment and production release on Vercel

PROJECTS

MyNkap: AI-Assisted Personal Finance SaaS Platform

Founder & Fullstack Developer · October 2026 · my-nkap.com

- Development of a complete SaaS platform with React, FastAPI and PostgreSQL
- Integration of an AI API that analyzes spending, predicts financial trends and provides personalized advice
- Containerization with Docker, deployment on a VPS with Nginx and SSL, CI/CD pipeline with GitHub Actions
- Around thirty active users within the first month in production

RayCard: Virtual Cards Linked to Mobile Money

In development

- Flutter mobile application for creating virtual cards from Mobile Money accounts
- REST API with FastAPI and PostgreSQL, web admin dashboard with React

EDUCATION

African Institute of Computer Science (IAI-Cameroon), Yaoundé

- Higher Technician Diploma (DTS) in Computer Science: **2025**
- Engineering Degree in Computer Science (Ingénieur des Travaux Informatiques), Software Engineering: **2026**
